

## STRATEGIC INVESTMENT PRINCIPLES TO MAXIMIZE PORTFOLIO RETURN

## TYPICAL PORTFOLIO ASSET ALLOCATION

#### **DEBT**

60%

Cash

Bank CDs

**Bonds** 

**Bond Mutual Funds** 

**Bond Variable Annuities** 

# EQUITY 40%

Stocks

**Equity Mutual Funds** 

**Equity Variable Annuities** 

## OPPORTUNITIES TO IMPROVE PORTFOLIO POTENTIAL RETURN

## 1 Risk of an Irrecoverable Portfolio Loss

The types of securities owned expose the portfolio to a risk of an *irrecoverable* loss of principal and/or erosion of its purchasing power.

### 2 Unfavorable Asset Class Allocation

Total return potential is limited by a large weighting in low-return asset classes.

## **3** Poor Security Performance

The securities held within each asset class have limited return potential.

### 4 Inefficient Portfolio Design

The use of investment products (such as mutual funds and variable annuities) and certain portfolio strategies result in high operating costs and unnecessary taxes.

#### DOW WEALTH MANAGEMENT APPROACH

#### Portfolio Safety

- Minimize the risk of a permanent loss of principal by owning predominantly high-quality securities.
- Hedge against inflation with equity holdings and short-term, fixed-income assets.

### Portfolio Asset Class Optimization

By reducing the risk of an *irrecoverable* portfolio loss through portfolio strategy and security selection, a greater allocation to the potentially higher return equity asset class may be achievable.

### **Total Return Investing**

Dow uses an academically-based investment approach to identify *high-quality, growth-oriented* companies.

#### **Own Securities Directly**

Avoid the market inefficiencies of product investing and potentially reduce tax liabilities by using private separately-managed accounts.

## DOW WEALTH MANAGEMENT STRATEGY

#### **DEBT**

High-Quality, Short-Term Fixed-Income Securities

Significantly increased allocation to equity:

### **EQUITY**

Direct Investments in High-Quality Stocks of Growth Companies

INTENDED RESULTS • Protect the portfolio against an irrecoverable loss of principal • Protect its purchasing power with a hedge against inflation
 Improve the portfolio's total potential return by careful selection of the underlying assets owned • Be operationally- and tax-efficient

#### EXAMPLE: \$500,000 INVESTED 1993-2012 **TYPICAL EXPECTED EXPECTED HIGH-QUALITY CURRENT INVESTMENT PORTFOLIO ASSET TOTAL RETURN ON \$500k RATE OF DIRECT EQUITY** VEHICLE **ALLOCATION RETURN OVER 20 YEARS STRATEGY** Bonds-Directly-Owned 6.34% DEBT **Mutual Funds—Bonds** 5.12% 60% **EQUITY** By concentrating 100% Variable Annuities—Bonds 4.01% on *High-Quality* \$823k \$1.1m \$1.5m **Securities** \$2,700,000 Variable Annuities—Stocks 6.19% **EQUITY Mutual Funds—Stocks** 6.98% 40% Stocks—Directly-Owned 8.22%

RATE OF RETURN SOURCES:

Bonds—Directly-Owned: Barclays US Aggregate Bond Index

Mutual Funds—Bonds: Thomson Reuters: Thomson US All Fixed Income—Mutual Funds
Variable Annuities—Bonds: Thomson Reuters: Thomson US All Fixed Income—Variable Annuities

Variable Annuities—Stocks: Thomson Reuters: Thomson US All Equity—Variable Annuities
Mutual Funds—Stocks: Thomson Reuters: Thomson US All Equity—Mutual Funds
Stocks—Directly Owned: Standard & Poor's 500 Composite Total Return Index

High-Quality Stocks: Dow Jones Industrial Total Return Index. Average compound annual return: 9.64% (1993–2012)

20-year (ended 12/31/2012) compound annual returns

It is not possible to invest directly in an index. Barclays U.S. Aggregate Index is an index comprised of approximately 6,000 publicly traded bonds including U.S. government, mortgage-backed, corporate and Yankee bonds with an average maturity of approximately 10 years. The S&P 500 Index is a broad market index of 500 stocks and is a proxy for a portfolio of average quality stocks. The Dow Jones Industrial Average is an index of 30 stocks and is a proxy for high-quality stocks.

Allocations are for illustrative purposes only. Past investment performance is not indicative of future results.
